Objectives

I am a passionate business solutions and software developer, who recently completed Bachelor of Commerce in Information Systems (NQF-7) from North-West University, equipped with a strong foundation in software development, systems analysis, and IT solutions. I have a passion for Software development, Systems and Business analysis, following all SDLC principles, with a proven track record of delivering innovative technological solutions. I am committed to bridge the gap between academic knowledge and real-world industry applications. My technical proficiency combined with strong problem-solving skills and collaborative approach enables me to design and implement impactful digital solutions. I am driven by continuous learning and a genuine desire to contribute meaningfully to organizational success through cutting-edge technology and strategic thinking.

Experience

-
- **Elevate Graduate Programme - Business Analyst Intern | Telkom – Openserve**
2026 Feb – Present

- ✓ Identify business requirements based on current and future business initiatives, direction and goals within current and future IT System operations.

- ✓ Assess the impact of changes, capture, analyse and document the requirement and then support the communication, testing and delivery of those requirements with the relevant parties.
- ✓ Support business during the change request process as to ensure the documentation and process is followed within the organization's guidelines and policies.
- ✓ Assist business, if needed, to explain or present the change during stakeholder alignment meetings.
- ✓ Ensure that designs are within the best interest of the client, organisation, business and IT and that the change receives the required importance within the release schedule.
- ✓ Ensure the design documents clearly stipulate the requirements as per the request by business.
- ✓ Evaluate Functional Specifications according to the organisation specification.
- ✓ Review the functional specification and ensure the change receives the required importance within the release schedule as stipulated by business.
- ✓ Attend vendor scoping/functional design sessions to: Provide business requirement input, to influence system designs and to identify business clarification items.
- ✓ Set up sessions with business to discuss clarification items.
- ✓ Conduct sessions with business to discuss clarification items raised by vendors as required.
- ✓ Communicate decisions taken by business.
- Verify impact of system designs on business requirements.
- ✓ QA review and sign-off business requirements and rules defined by vendor negotiating.
